
Solar for Schools

The Anaheim Public Utilities teamed up with the Placentia Yorba Linda School District, the Anaheim Elementary School District, the Magnolia School District, the Centralia Elementary School District, and the Savana School District to locate nine solar carports at local public school campuses in Anaheim to educate students on the benefits of solar and help offset the districts' expenses.

The projects incorporate 1,543 kW of solar photovoltaic. The projects were completed February 2019. The 20-year License Agreements expire 2039.
