

# ABEES - Lighting Incentive Program

Lighting program consists of performance and/or prescriptive incentives.

***BEFORE STARTING*** any energy efficiency projects, please contact Anaheim Public Utilities for more information. Projects in construction prior to application approval and pre-inspection **MAY NOT BE ELIGIBLE** for incentives. To require further assistance regarding the incentive application or process, please email [ABEES@anaheim.net](mailto:ABEES@anaheim.net) for program support.

Please read the “Program Guidelines” document before beginning the incentive application process.

## PERFORMANCE-BASED LIGHTING INCENTIVES

Table 1: Performance Based Lighting Incentives						
Category	Program Incentive Description	On-peak kW reduction, Rate <b>(A)</b>	Annual kWh saving, Rate <b>(B)</b>	Energy Incentive <b>(C)</b>	Warranty Requirement <b>(2)</b>	Incentive Not to Exceed <b>(D)</b>
High Efficiency Lighting (Controlled & Non-Controlled)	<b>DLC Required</b> New LED Fixture LED Retrofit Kits <sup>(1)</sup>	\$300/kW	\$0.10/kWh	A or B whichever is greater	5 Years or 50,000 hours	25% of project cost or \$50,000 whichever is less
	<b>Non DLC</b> New LED Fixture LED Retrofit Kits	\$150/kW	\$0.08/kWh	A or B whichever is greater		

<sup>(1)</sup> All New LED fixture/LED Tube/IRK technology must be certified by either Design Lights Consortium (DLC) or Energy Star, and **must be listed and approved in the LED Qualified Product List (QPL) (see link below)**.

For a list of qualified products visit link below.

[http://caioulightingqpl.com/?WT.mc\\_id=Vanity\\_ledqpl](http://caioulightingqpl.com/?WT.mc_id=Vanity_ledqpl)

<sup>(2)</sup> Customers are responsible to verify product warranties and specifications provided by the manufacturer.

All lighting retrofit components must carry the appropriate, designated Underwriters Laboratory (UL), or Intertek’s Electrical Testing Labs (ETL) Listed Mark, and must be Restriction of Hazardous Substances Directive (RoHS) compliant. LED lighting projects should not jeopardize appropriate lighting levels in favor of energy savings. All fixture retrofits must remain in compliance with electrical safety and certification codes to qualify.

- |   |                      |
|---|----------------------|
| • UL or ETL certify                           | <b>(Required)</b>    |
| • DLC listed                                  | <b>(Recommended)</b> |
| • Minimum of ≥ 80 Color Rendering Index (CRI) | <b>(Recommended)</b> |
| • ≥ 95 lumens / Watt                          | <b>(Recommended)</b> |
| • L70 > 50,000 hour Lumen Maintenance         | <b>(Recommended)</b> |

## **PRESCRIPTIVE-BASED LIGHTING INCENTIVES**

Incentive applies when replacing screw-in type standard light bulb (incandescent, halogen or CFL) with a new screw-in LED type.

The following are requirements for the incentive approval:

- **The new lamp must have an UL/ETL rating**
- **The new lamp must have an Energy Star rating,**
- **The new lamp must have an equivalent lighting output**
- **The new lamp must provide wattage reduction**

<b>Table 2: New Screw-in LED Replacing Standard or CFL Bulb</b>			
<b>Interior &amp; Exterior EXISTING LAMP</b>	<b>New Lamp Type SCREW-IN LED</b>	<b>Incentive</b>	<b>Incentive Not to Exceed</b>
Incandescent, halogen or CFL	Energy Star LED	Up to \$5.00 /lamp	25% of Project cost or \$50,000 whichever is less
